Frequently Asked Questions

What is surplus?

We buy closeouts, inventory overruns, mis-manufactures, and items whose time has not come. We can usually acquire these items on a one-time-only basis. When a surplus item is gone, it is gone. So if you see something you love, best get it now since we may not have it tomorrow. Our website is frequently updated with our inventory. If you see an item in our catalog, but cannot find it online, it means we have sold out of that item. If our stock of the item you have ordered is exhausted we will refund that portion of your remittance. When we can't find surplus, we may carry regular merchandise which we think those interested in learning and tinkering will find appealing, but only if we feel it is good quality at a fair price.

Can I return items?

Yes. We accept all returns without question and will either refund your purchase price or send you a replacement, as you chose. Returns must be made within 30 days of purchase. For complete details, please check the order form bound in the center of this catalog.

What forms of payment do you accept?

We accept Visa, MasterCard, Discover, checks and money orders. We are sorry to report that we cannot accept CODs, cash, stamps or gold. **If paying by check, please be aware that you are authorizing American Science & Surplus to use the information on your check to make a one-time electronic debit to your checking account. This electronic debit will be for the amount indicated on your check. If you do not have sufficient funds in your account, a returned check fee may be debited from your account. If you have any questions, or choose not to have your check converted into an electronic item, please contact American Science & Surplus at (888) 724-7587.**

Do you have a minimum order requirement?

We regret that the costs of doing business preclude us from processing orders of less than \$10.00 merchandise value (exclusive of shipping and handling). We will return orders of less than \$10.00 merchandise value.

Additional information can be found on the order form bound in the middle of this catalog.

Original Slinky®

Does anyone need to be told what a Slinky(™) toy is?? Okay, it is a very slack spring, 2-7/8" dia x 2-1/2" long, compressed. It will stretch out to about 5 or 6 feet long without deforming. That's the boring part. The interesting part is that it "follows" itself. Slish it from hand to hand. Put in on the top step of stairs, flip the end down a step, and watch it walk down stairs, or down an incline. Believe us, no childhood (or adulthood) is complete without an original stainless steel Slinky(™). It was hard for us to find it, but we are glad we did. You should be too. **⚠WARNING: CHOKING HAZARD-Small Parts. Not for children under 3 yrs.**

Put two fingers in the little pockets on his paws, pull his bungee arms back, and let him go. You'll recognize these little 2-1/2" tall plastic troopers, cast in various colors and poses, with assorted equipment, and attached to 8" dia parachutes. Kids have been throwing them up in the air, or out the window, and watching them float to the ground for three generations.

Ga-Boooooiiiiinnngggg!

The manufacturer calls it the Thunder Tube™. We call it indispensable for the amateur Foley operator. It's a 7" long x 2-1/2" dia PVC tube with a resonant head at one end attached to a 17" long x 3/16" dia extension spring. Shake it, scrape it, wiggle it, use your palm to muffle it and you generate creaks, deep warbles, rumbles, weird heterodyne-ish gong effects, wa-wa's, rude noises, and, yes, realistic thunder. A perfect musical companion to your cuica and rain stick—and good, clean fun around the house. Don't make a sound-track without it.

Incredibubbles!

We love these! You're going to love these! Your kids are going to love these! Hundreds of clear marble-sized bubbles can cover the floor, cling to the sides of furniture, land on your arm. They float enchantingly, rising on air currents you can't even feel. After a few seconds, the bubbles are hard enough to catch or stack. Some will still be perched in out-of-the-way spots a day later. Touchabubbles goop, thicker than the bubble-blowing liquid you're familiar with, comes in a 4" plastic test tube with a wand built into the cap, and a clip on the side so you can carry it in a shirt pocket. The goop is nontoxic, but it tastes really bad, and you probably won't want these landing on expensive tabletops, so kids under 8 should have adult help with them. They should be sharing the fun anyway! **WARNING: CHOKING HAZARD-Small Parts.** Not for children under 3 yrs.

Newtonian Fun

Rattlebacks are plastic semi-elliptical shapes, 3-7/8" long, that illustrate Newton's laws of motion, while mystifying kids. Set them down (the rattlebacks, not the kids) and their offset center of gravity makes them spin. Spin them in one direction and they stop and reverse themselves. You get a package of (10) in assorted colors, along with a lesson plan and suggested activities.

94180 Rattlebacks

Rattlesnake Eggs

Or singing suppositories. The pair is very magnetic, whatever they are. The 1-3/4" long oblate spheroids look like highly polished black hematites. Hold them an inch apart in your palm, toss 'em into the air and listen to them make a sound like the cyber-crickets. Or an electrocuted chicken. The manufacturer suggests keeping these mega-magnets away from computers, pacemakers, TV sets and credit cards. **⚠️WARNING:** CHOKING HAZARD-Small Parts. Not for children under 3 yrs.

Look, Up In The Sky...

It's one of the Sky Ripperz, our super-zippy 11" long slingshot rockets. Fire it from its very own rubber-cord launcher and watch it soar up to 250 feet. Has a foam nose to prevent serious damage and an on-board whistle to add to its rocketishness. Carl uses his to shoot in orders for burrito deliveries (bean, extra cheddar), but he lives really close to a Taco Horn. **⚠WARNING:** CHOKING HAZARD-Small Parts. Not for children under 3 yrs.

Yes, we can admit it when something is ridiculous, but that doesn't mean we don't love it. These little fingertip rubber hands come in a set of (3), (1) each in the classic rock, paper and scissors formation. Stick them on your fingers and then stick out the appropriate digit instead of making the signs themselves. You could use them while the other guy uses his actual fingers, or you could buy two sets and have twice the dopey fun. Bonus: the rubber is realistic-looking and kinda creepy feeling.

95598 Rock papers Scissors Hands \$3.50/pkg(3)

For ages 8 and up.

93859 Light-Up Gyroscope \$3.95/each

Renaissance Kaleidoscope

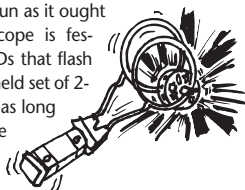

Forget that the 6-3/4" long body is festooned with Latin phrases and old maps. The stones/beads/glass inside the tube would make designing windows in cathedrals a snap. Bone Up On Anatomy

You're not going to blow money on an actual human skeleton, are you? Consider that for a tenth of the price you can get an anatomically accurate skeleton done in plastic. This model is male (judging by the hips) and has many articulated joints—jaw, shoulder, knee, etc. Its small size (33") makes it practical for classroom use, since it can be passed around the room. Other nice touches include discrete neck vertebrae, a sectioned skull, and very little "flash" from the plastic molds. It also comes with a metal display stand, weighted at the bottom to prevent spills. Yes, some concessions had to be made because of the size and price, but this is still an invaluable teaching tool, and quite a nice decoration for those with morbid minds.

No, no, paint a picture of your wagon. You take care of the paint, and we'll send you (4) high-quality, real-deal artists' brushes from our assortment of oil, acrylic, tempera and/or watercolor brushes, from round and skinny to flat and sorta fat. You'll get at least (3) different kinds. Made of sable, ox hair, fitch bristle or nylon, all from Duro.

43395 Artist Brushes \$4.95/pkg(4)

Artist's Brushes

Maybe a little eclectic for an artist with a single style, but perfect for one who's still searching for himself. Or for any hobbyist. There are no (2) brushes exactly alike in this set of (15). They all have natural bristles, color-coded wooden handles and metal ferrules, but they range from fairly fine to 1/2" wide, and 7" to 10" long. There are at least (3) different kinds of bristles, and they are round, blunt and pointed. A nice variety, and a very nice quality for this price.

Bugs N' Roses

Plus mermaids and tigers and hearts and flowers and a bunch of other things for boys and girls, all in our very assorted collection of temporary tattoos. Some are 2-packs of arm bands, some are in loose sheets of (9) or (10) tats, but we'll pick a pack that will look just stunning no matter where you stick them. And yes, that headline should have another apostrophe ('N'), but we're using the official Guns N' Roses precedent. 'Cause those guys love tats, too.

Girly Stickers

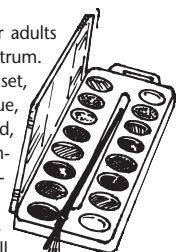

We don't actually know if there are 4" tall princesses to stick these dress-up stickers on (we can't stay on top of everything) but if not, your kiddie could draw her own. She gets (9) stickers, with (2) long (2-3/4") gowns, a pair of glittery shoes, a handbag, (2) jeweled necklaces, a brooch and a compact.

45115 Dress-up Stickers \$2.95/pkg(2)

Leather Leftovers

What's left of a Kansas City cow after all the steaks are gone? Lots of leather! (Think buckskin, not biker jacket.) You choose from: 1) The one-piece Lace Leather Belly. Really more of a long half-belly, this solid piece of leather is between 2-1/2 and 3-1/2 sq feet. Ours was approx 10-1/2" wide x 45" long x 1/8" thick. 2) A pack of Leather Strips. Ours was a very assorted 2 lbs of strips and larger pieces of leather, 1/16" to 1/8" thick, in rust and brown. 3) The Farmer Bundle Repair Bag, 2 lbs of scraps in various colors. Ours contained a solid 12" x 8" piece and a very large bundle of brown leather thongs 47" long x approx 1/8" square. Lots of variety, and lots of heavy leather for the price.

Hunk-O-Tube

You almost certainly have an unmet need for 9-3/4" long x 15/16" OD black closed cell foam with a 1/4" bore in the middle. Big fat soda straws? No? How about handles for all your homemade tools? Slit them and make car-door guards? Pad your own coat hangers? Slice 'em up for washers or custom furniture pads? Probably best just to buy a bunch and figure it out later.

Just Be Twine You & Me

Enough heavy-duty string to tie up brown paper packages for the next twenty years. This giant roll has a whopping 9,000 feet (Billy just got back from measuring it) of #16 twine, which is tying-up-newspaper-bundles weight. The spool weighs in at 8 lbs and stands 11" tall x 8" dia across the bottom. Unspooled, it would stretch 1.7 miles. Tensile strength is 40 lbs, so if you truss up a turkey, he isn't going anywhere. The spool is also really impressive just sitting on your kitchen counter.

Skinny Paracord

Micro tactical cord measures .046" (1.18mm) dia on 125-foot spools. Made in the USA by Atwood Rope Mfg., it's UV and rot resistant with a 100-lb test strength. Lotsa solid and blended colors and we'll just grab (3) different-colored spools for you to save you the trip to our warehouse.

--------------	-----------------------	--------------------

Fishnets

Not fishnet stockings, but netting for actual fish, direct from the U.S. Army (you'd think Navy, wouldn't you?) in olive drab. It's a survival thing. You get a 10-foot x 5-foot net made of 3/4" squares individually knotted from twisted cotton/nylon, so the net won't unravel if torn. Might have a slightly musty aroma (but definitely not fishy) that a little sunshine time will fix. Great for maritime-theme decoration, bible-camp plays (filled until breaking, walking-on-water background prop...) or, we suppose, fishing. And perfect if you want to go to a costume party as Poseidon.

39763	Army Fishnet	\$19.95/each
--------------	---------------------	---------------------

Rot-Resistant Twine

Don't you hate it when your twine rots? Us too. That's why we always use this mildew- and rot-resistant nylon twine for household repairs, gardening, boating, etc. You get (3) 325-foot spools of white twine for a total of 975 feet. Stretches to absorb shock and resist breaking.

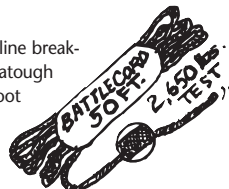

94411	325-Foot Nylon Twine	\$4.75/pkg(3)

Prepare For Battle

Or just stop worrying about the line breaking. Battlécord is skinny but megatough stuff. And this one is a 50-foot length of black cord rated for 2,650 lb test. Measures 1/4" dia with a 7-strand core and is rot, mildew and UV resistant. Made in the USA for Atwood Rope.

Tiny Brass Ball Chain

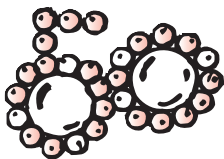

Everybody's favorite, the traditional little brass ball chain, good for keys, ceiling lights, tiny zombie dioramas, whatever. You get (10) hunks, 30" long with the little connector at one end. Order a bunch and get crafty.

43823 Brass Ball Chain \$3.50/pkg(10)

Bear With Us

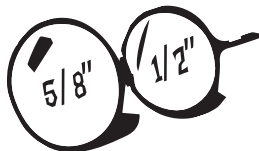

We think of these as industrial worry beads, but they're really 5/16" dia (8mm) steel ball bearings, ready to be put to whatever ball-bearing uses you might have. Our each is a pack of (50), which should cover a lot of worries, and whatever else you can come up with. **⚠WARNING: CHOKING HAZARD-Small Parts. Not for children under 3 yrs.**

95315 Ball Bearings \$2.50/each

Balls Of Steel

What can we say about chrome steel ball bearings besides their essential uses? Well, a lot, actually. They're perfect for Rube Goldberg displays and artwork. Imagine them in various sizes in a glass container. Imagine dipping them in paint, rolling them on canvas and making the world forget about Jackson Pollock. They also work as heavy-duty marbles, and might even calm you if you place a few in your palm and work them like a stress ball. See what you can come up with when the wheels start turning? Ball bearings. Wheels turning. We know you got it. You pick the 5/8", 1/2" dia.

Sheet-Metal Worker Alert

Thin-sheet-metal workers, that is. As in crafter/jeweler/model-maker types. You get a 3-pack of very nice, bendable, metal foil sheets, 5" x 7" x .005" thick, (1) each in copper, brass and aluminum.

85058 Metal Sheets \$6.85/each

Mothbusters

These 2" dia x 3/8" thick rings of actual cedar have a 7/16" hole in the middle so you can slide them over coat hangers and foil the evil moths that wait for you to close the closet door before they eat your favorite coat. Which is fine, unless your coat is polyester, in which case you could use these to make cedar wagon wheels or checkers on a stick or something even more inventive. Don't forget that they deliver the fresh scent of cedar, too. Get thinking. Our each is a pack of (24) rings.

Knott Just For Berries Anymore

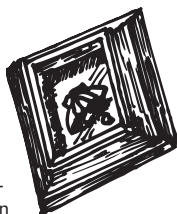

This nice 10" wide x 8" clear plastic easel is handy for signage, photo displays, splatter-proof recipe-holding or tons of other uses. The top is folded back over the front, leaving a space to slide up to an 8" x 10" sheet behind it. Has an easily ignored Knott's Berry Farm logo on the southwest corner. Stands on a stable 2-3/4" base.

45050 Clear Easel \$4.95/pkg(2)

Shadow Frame

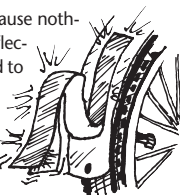

This maple-ish-finish wooden frame is not unlike a shadow box, with 1-1/8" between the glass and the backer board, perfect for mounting three-dimensional displays. (Can you say "decoupage"?). Measures 7-3/8" x 9-3/8" at the back with a 4-3/8" x 6-1/4" glass and 1/4" mounting holes on one long and one short side.

44034 Shadowbox Frame \$4.50/each

Take A Little Time To Reflect

And people won't crash into you, because nothing says safety like this high-quality reflective tape, the same material that's used to make stop signs. You get (4) glossy, self-adhesive red reflective tapes, 12" long x 3/4" wide. We're thinking bike fenders and helmets, dog collars, garage door frames, anything that could benefit from a heightened visibility.

39825 Reflective Strip \$3.95/pkg(4)

Shoe 'Nuff

You'll never need sneaker laces again if you buy by the gross. You pick standard flat black laces at 45" or 54", or standard flat white laces at 45". In all cases, you'll get (12) dozen, or (144), laces for .135 per lace or .27 per pair. Try to beat that price, even at your big box marts. For you crafters, think of something that takes 144 strings. Free bonus: the little plastic tips are called aglets.

African Blackwood Stock

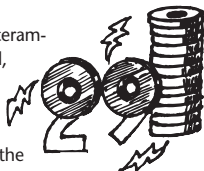

Attention woodworkers and Benny Goodman impersonators. We have on hand a whole bunch of milled and sanded pieces of African Blackwood (Dalbergia melanoxylon) that were destined to be clarinet bells. Beautiful stuff. Shipped from France but likely grown in Tanzania. Measure 4-3/8" long, 2-11/16" at the bottom, 29/32" ID at the top for 5/8" in, then slightly narrower.

43831 Milled Bells \$2.95/each

Plain Donuts

Can't beat a classic. These uncoated ceramic donut magnets have a 1-lb pull, which makes them dandy for classroom or refrigerator use. They measure 1-1/4" dia x 3/8" ID x 3/16" thick and are polarized on the faces. You get a wrapped roll of 29 donuts.

40007 Uncoated Magnets \$5.95/pkg(29)

Magnets For Next To Nothing

Although they work best next to steel. You'll get a whole bunch (that's 25) of ceramic magnets at 3/4" dia and either 1/4" thick or 3/16" thick with a center bore approx 1/4". (We'll just grab what's on top, OK?)

89924 Ceramic Magnet Pac \$6.95/pkg(25)

DIY Magnet

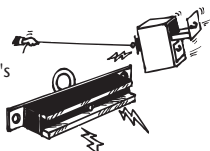

Make your own fridge magnets. Everybody's doing it. You get a brown vinyl sheet magnet that is self-adhesive on one side so you can stick pics, or whatever, to it. Or cut it into whichever shapes and sizes you like. No special scissors needed. Measures 12" x 10" x .019" thick.

43510 Magnet Sheet \$8.75/pkg(3)

A Real Grabber

Okay, it isn't the cheapest magnet in the warehouse - but we dragged John's 165 lb filing cabinet around the dock with this 4-7/8" x 1" x 3/4" ceramic magnet, we're rating it conservatively at 100 lbs of pull, and we think it's a bargain. It has a 6" bracket with mounting holes on 5-1/2" centers, plus a 1/2" ID eyehook bolted into the center of it. It's all set to troll the bottom of the lake next time your filing cabinet falls overboard.

91949 Pick-Up Bar Magnet \$10.95/each

Nickel-Coated, Quarter-Sized

Nice rare-earth neodymium disk magnet, 1" dia, about the same as a quarter but over twice as thick at 4mm. Rare-earth magnets are permanent and powerful, and this one has approx 7 lbs pull, and always will. Comes with a galvanized metal keeper approx 2" dia so you don't lose it.

93798 1 Inch Disk Magnet \$4.25/each

Small But Rare

Very nice little rare-earth magnet, 3/8" dia x 1/16" thick. Disk-shaped, plated, with good pull for its size. Perfect for a latch on a storage box or cabinet door when paired with a small steel screw or brad.

40643 Small Disk Magnet \$3.75/pkg(10)

Sticky Bar Of Silver

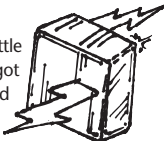

This plated N45 neodymium magnet is shaped like a miniature silver ingot, measuring 1-1/2" long x 1/2" wide x 1/4" thick. Has a big hangability quotient, which the manufacturer claims is 26 lbs of pull, meaning it's probably closer to 20 lbs. Impressive either way.

95659 Neodymium Bar \$4.85/each

Killer Magnet

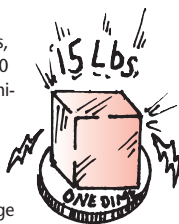

Once upon a time, a copywriter put this little magnet next to his computer monitor and got really pretty, wavy, aurora-like effects. And then got a new monitor! Don't try this at home. Our shiny, silver-colored 1" x 1" x 1/2" neodymium magnet looks innocent, but is industrial strength, pulling something like 25 lbs with enough strength left over to erase all your credit cards. And wreak havoc with your monitor.

38694 Killer Magnet \$14.50/each

The Most Beauteous Cube

Voted most likely to attract by the judges, this magnet has the relative strength of 10 men. A shiny silver 1/2" cube of neodymium magnetism, it packs approx a 15-lb pull. If our boss Pat were that strong he could lift 2,160 lbs! Besides its super-power strength, this beautiful cube also would improve the looks of your fridge or bulletin board to no end.

94775 1/2" Shiny Magnet Cube \$5.95/each

Magnetic Pull

Add a door/drawer pull to any ferrous surface with this 1" dia x 1/4" thick neodymium disc in a polished sleeve with a 3/16" dia hole in a stand-off. Comes with a 1" slip-ring attached, and hangs on for 22 lbs worth. Plenty handy for hanging stuff from other stuff, too.

93515 Magnet Pull \$8.75/each

Neodymium Column

We're liking this little plated N45 neodymium magnet because it will stand on end and stick out very prettily on the ice box. Measures 1" tall x 1/4" square with a hefty, for its size, 20 lb pull. (Will also lie down on its side, of course, because everybody does.)

95658 Columnar Magnet \$2.50/each

A Lot Of Pull

Pick up this 1-3/4" x 7/8" x 3/8" ceramic pick-up magnet while we still have it. It's in a heavy metal housing and has a stationary metal hoop, about 1/2" i.d., on top. The manufacturer tells us the magnet will grab up to 5 lbs of metal, however Pat and Magnet Testing Team #3 have repeatedly lifted 10+ lbs, so it's very strong. Especially if you're going to dangle it on the end of a cord to gather spilled nails or to fish your keys out of the lake/pond/sewer/drain!

91859 Pick-Up Magnet \$2.95/each

When you peer through your magnifying glass at this specimen, or focus your microscope on it, even at the lower magnifications which work best, you're looking at one big bug. Make that (4) big bugs. Getting tired of buying them and trimming them and losing them? Get rid of wicks altogether with this nifty little alcohol burner with a copper capillary tube in place of a cotton wick. Burns 90ml of denatured alcohol and comes with a heat shield (packed inside the reservoir) and a burner cap. Don't forget to remove the little rubber plug – it's there to cover the holes in the copper tube when not in use. And this is lab equipment, so resist the temptation to use it under a chafing dish; initially, it flares up a tad more than is good for Swedish meatballs.

Bad joke. Never mind. This little digital scale is actually called a "book scale" because it looks like a book, not because anyone cares how much War and Peace weighs.

Scope Your Stethos!!

Stethos is Greek for chest. Indeed you can scope your stethos with this stethoscope, or your friend's or your dog's. But it works equally well for picking up any sound being transmitted through a solid medium. Listen to the air flowing through the heating ducts, the water in the pipes, the sounds of machinery, the termites munching on the floor joists!! The color does vary so we will select from what's currently available. We've had blue, teal, red, black, burgundy, green and purple, but there may be other colors yet to be seen! A great discovery device whether for biology or other pursuits. Not of professional quality, but not just a toy.

Rejoice, we have finally found a source of reasonably priced borosilicate glass. This is the kind of glass in the trade marked Pyrex™ and Kimex™ labware. This stuff is imported from China, and is considered student grade, which is good enough for anything but the most exotic applications. Stick It In Your Ear

After years of writing about swabs you shouldn't stick in your ear, it's a pleasure to offer this digital Bluetooth ear thermometer from A&D Medical. Please, by all means--stick it in your ear. Measures body temperature in a hot second, which is displayed clearly on the large LCD along with a happy or frowny face, depending on whether your patient is actually sick or just trying to stay home from school. Plus, you can store up to 10 measurements in the built-in memory and switch from C° to F°. The whole shebang is easily cleaned up with water or rubbing alcohol. Why such a bargain? Well, it claims to be able to connect to devices via Bluetooth, but we couldn't get that to work with our fancy smart phones. Who needs that anyway? This this is great as it is. SURPRISE!

Mystery boxes of stuff like what you see in the catalog. Maybe we had a little left but not enough to continue the listing. Maybe we only got a few as part of an odd lot. Maybe we lost some, and just found them in the warehouse. You will get items which originally listed for at least \$25.00 total in our catalog (or would have, if we had enough). You pick. The "electro-mechanical" box has things like motors, switches, hardware and components that are useful parts but want to be worked into something bigger. The "consumer" box has more ready-to-go type items, and things that don't have as technical a flavor, like bottles, toys, books, and giant rubber bands. The fun is in the mystery and surprise. Perfect if you don't know what to give Aunt Maude and Uncle Ned, or if you can't decide how to bring your order up to the minimum. Every couple of months the contents will keep changing, so even if you have gotten a box before, feel free to order again!!

Green Laser Par Excellence!

Da Mare could use this to point out cracks in the infrastructure at Wrigley Field. You, having a forgiving nature, will resist the urge to point out cracks in da mayor's infrastructure. You will, of course, use it to point out chimney cracks to the tuck-pointer, a cracked limb to the tree-trimmer, and the crack in your profit picture during a slide presentation. You can do all that and much, much more with the bright light from this 5mW green laser pointer. It's an unbelievable tool. If you need a laser pointer that seems to go on forever and is so strong that you can actually see the beam in the dark, it will be the best low-cost investment you ever made. Or the coolest high-end toy. The 532nm Class IIIa light is 5-5/8" long x 1/2" dia, with (2) "AAA" batteries (included), a momentary-on switch, pocket clip, and case. Mood Glasses

Could be acrobats in a reptilian circus, but they're not, they're plastic drinking glasses that start out a flamingo pink and slowly morph into a grape-soda color when cold liquids are poured into them. Even water takes on an alarming purple hue when you look into the glass. They stand 5-3/4" tall and say they hold 16 oz. We'd say it's more like 12, but who cares when it can change color.

Ouch!

Looks like a cheap kid-sized tennis racket, but brother, this ain't for the kids. It's actually a fine way for adults to work on their upper-body strength and kill bugs at the same time. 18" long, with a 6" wide paddle lined with metal grid. A coil in the handle sends high voltage through the paddle when a button is pushed; hit a bug with it and the bug will bug you no more. But despite the manufacturer's claims that it's safe for people, Scott reports that flesh-paddle contact delivers a nasty shock, nasty enough to say "Keep this away from kids!" We've seen these in other catalogs for about twice the price, so buy it from us. Just be careful with it. (2) AA batteries, not included.

Drinking Bird

You're buying the drinks and this wacky, yet debonair, bird with a top hat and plastic base (7" tall OA) can't get his fill of water. Get him started, and he dips his beak into your glass repeatedly. How? Fluid inside his glass body condenses from the evaporative cooling of the water off the bird's beak, making it top heavy and dunking it back into the water. The condensate rejoins the liquid pool in the bird's bulb, and he tips up again. Process continues indefinitely. It works, but it's not any more than moderately well made, and not any more than moderately priced. **WARNING!** The fluid and dye inside the bird can permanently stain, and the bird's glass body can easily be broken. Children are fascinated by the bobbing bird, and the educational possibilities are great. But they should watch him, not fondle him!! Manufacturer warning states this item is not intended for children 8 and under. **ΔWARNING:** CHOKING HAZARD-Small Parts. Not for children under 3 yrs.

New coating provides protection for the mirror surfaces. Highly recommended. **ΔWARNING:** CHOKING HAZARD-Small Parts. Not for children under 3 yrs.

Isaac Newton In The Dark

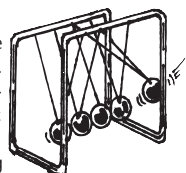

OK, glass with blue LEDs, but still. This is a Newton's Cradle, always seen with steel ball bearings, but this time with frosted glass balls glowing a stunning bright blue while they swing on wires and prove Newton's Third Law, and if you have to look that up you shouldn't be reading this catalog in the first place. Just kidding--it says that for every action there is an equal and opposite reaction. You knew that. Newton would have ordered multiples of this beauty for all of his friends. Measures 7-3/4" tall on a 7" x 6" base with the standard (5) globes. You add (6) "AA" batteries for the glow.

Swingin' Desk Toy

Newtonian demonstrator for science teachers. Mindless play for the rest of us. These are shiny, nicely balanced, high-performance examples of the classic Newton's Cradle - a ball on one end of a row of (5) suspended, barely touching balls swings into the others, and the ball at the opposite end reacts to the collision. The 11/16" dia balls in the small version (all-metal frame 6-1/2" high x 4" x 4-1/4") will collide about 30 times. The 7/8" dia balls in the large version (metal frame 5-1/4" high x 4" x 6", with a wooden base) will collide about 100 times. Awesome. Even more awesome that we paid someone to count the bounces just for you! (Unpacking note: Less awesome if you just yank it out by the suspension lines and pull a couple of balls loose. Be gentle.) **ΔWARNING:** CHOKING HAZARD-This toy contains a small ball. Not for children under 3 yrs.

Perpetual Motion

Spin this spindle and watch it turn in perpetuity!! Well, for a long time anyway. Inside the 5-1/2" long colored plastic spindle are magnets which are repelled by magnets in the 5" x 3" black plastic base. The variously colored spindle floats in the air above the base thus virtually free of normal friction. Nifty desk toy named "Revolution". **ΔWARNING:** CHOKING HAZARD-Small Parts. Not for children under 3 yrs.

Just Plain Tins

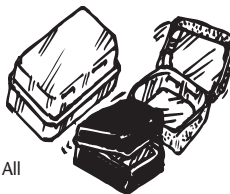

The country is rife with people who like little steel tins to keep their little stuff in because they hate plastic, plus steel doesn't crack, but they're stuck with tins that have branding all over them because most of the little steel tins come with breath mints and overpriced candy in them. But now that long, national nightmare is over. Herewith, plain, steel-colored steel tins with nothing printed on them, 3-5/8" x 2-1/4" x 3/4" with snap-shut flip tops. Refreshing. More refreshing than a mint.

How Does It Work?

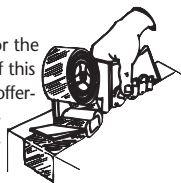

Why does it do that? Develop an elemental understanding of magnetism, electromagnetism, electrochemistry, radio, thermodynamics, light and optics. Simon Quellen Field's 228-page paperback, Gonzo Gizmos, Projects & Devices to Channel your Inner Geek explains processes, equipment and scientific terms — and then, for starters, tells you things like how to make a rotary steam engine in 15 minutes from a soda can, a candle and a few scraps of rubber tubing. It's the favorite of our resident geeks — but not for kids unless they're working with an adult. That would be a mature adult. An insured, mature adult.

Lazy Scott Bearings

Never seemed fair to nail the "lazy" tag so permanently on the "Susans" but that probably has no "bearing" on the issue. Also called turntable bearings, they are the square, flat ball bearing devices YOU bolt between two flat objects to achieve rotation. Like that spinning center section of a Chinese restaurant table. We had these in surplus once and they were quite popular. To our chagrin, we discovered they could be bought commercially for the same price. So we did. The 4" version is rated for a 300lb and the 12" (round) for 1000lbs.

Air output is via a 12" hose with a variety of valve adapters for tires, soccer balls, rubber rafts, and just dusting off the environment. Complete with a 0-250 psi gauge. We Traffic In Lights

And the traffic lights we traffic in are the LED versions, using up a paltry 6W. You pick red, yellow or green, all brand new, 12" dia with a gasketed rubber rim. Measure 5-1/2" deep with a pair of 3-foot leads for power. Some may be color LEDs but most will have color lenses. Why so cheap? We got them from a municipality in the frozen north where they discovered too late that LEDs don't generate heat, and won't melt the snow that lands on the lenses when the cold wind blows. Not every well-made rotary tool is a big-D. We consider this one not only a good-quality tool, but an excellent buy. The fitted plastic carrying case 12" x 8-1/2" x 3-1/2" contains not only the 120VAC-powered 8,000-30,000 rpm mini grinder, but a stand with a C-clamp to mount it on a bench or table, a 3-ft extension shaft, and a good assortment of bits, grinding stones, cut-off wheels, etc., including collets to fit 1/8" and 1/16" bits. The telescoping stand extends from 10" to almost 22" and holds the tool above your work, while you grind, sand, cut, etc., with the tip of the convenient, easy-to-grip, flexible extension. A nice package, and a very nice gift for yourself, or for anyone who enjoys working with hobby tools.

Attach Anything!

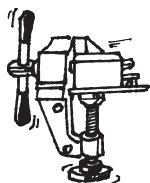

You need this. Anybody who's ever made a third trip to the hardware store on the same day needs this. The (100) -- count 'em, (100) -- chrome vanadium driver and bit attachments include slotted, Phillips, square (Robertson) head, torx, hex and 12-point bits, plus security Phillips, torx and hex, and (4) different driver adapters (one of which, a super-cute cup-hook driver, has us oddly excited). They're all in a flip-top plastic case. How come it's surplus? If you turn it upside down and shake it, some of the bits fall out of their little size-marked slots. So don't do that. Or stick a thin sheet of foam inside it and all will be well.

Hemostatic Heaven

Hemostats are the clamplike devices dangling from veins and arteries in melodramatic operating scenes. Our particular collection are Pakistani surgical-grade instruments made of magnetic stainless steel. As such we rate them pretty good, but not fantastic. Hemostats look like little pliers. The jaws are relatively fine, with rounded tips. The inside faces are lightly serrated to get a grip on tubing or body plumbing. And the handles are much longer than the jaws. Now the heavenly part. Great hobby clamps that can be worked into small areas. Fine heat sinks for electronics. Good hook extractors for trout fisherpeople. Excellent tubing clamps for flow-sensitive chemistry experiments. Sizes are approximate length.

Steampunk?

These non-fog not-really-welding goggles are just what you need to cap off your costume. Sure, the flip-up dark lenses are too dark to see through easily (that's why they have conventional clear plastic lenses underneath them), but leaving them flipped up just adds to your zany, adventurous, steampunk persona. Aesthetics include side vents and an adjustable elastic head strap. And the goggles accept standard 50mm replacement lenses, but if you think the party is going to be that rough, we suggest that it would be cheaper and easier to just buy a couple of pairs at this price-from-the-past.
